Versi Indoor Display

All-purpose digital signage display with
optional PCAP touch screen for interactive applications.

www.lamasatech.com

Wow your audience with sleek digital signage

Strong WiFi connectivity

The display features a dual band, high gain antenna for a strong WiFi connection.

Choice of screen size

Select from a 32”, 43” or 55” screen to suit your requirements.

700 nits high brightness

With a rating of 700 nits brightness your signage will be crystal clear even in bright locations such as retail stores with a lot of artificial lighting.

Ultra slim bezel

Measuring at just 13.6 mm, the frame around the screen is the slimmest on the market, ensuring no distractions from your content.

Anti-glare toughened glass

The toughened glass is resistant to glare from natural and artificial lighting and is designed to withstand damage in public environments.

Portrait or landscape orientation

Mount the display in either orientation depending on your content and preferences.

Touch or non-touch

Choose a passive non-touch display for advertising and signage or an interactive PCAP touch screen.

Versatile for touch and non-touch applications

Tamper-proof design
Security covers conceal all ports from tampering in public environments.

Connect a mini PC
For applications that require a Linux/Windows PC, connect your own NUC PC with HDMI in. For 43” and 55” displays mount your PC bracket neatly out of sight on the back of the display using the VESA mounting holes (75x75 mm or 100x100 mm).

Plug and play
Play your content via USB stick or run your application from the integrated Android 11 SoC.

Auto power
In case of power cuts and outages the display will automatically power on when the power is re-instated.

Simple install
A standard VESA wall mount is supplied with the displays for simple installations.

Connect accessories
With 6 USB ports you can easily connect accessories such as printers and payment terminals. Power directly from the built-in DC power port (subject to required power consumption).

Integrate easily into enclosures
Easily integrate into any enclosure or furniture, such as a kiosk frame, counter, or retail display.

Increase customer engagement and sales

The Versi Indoor display is a sleek digital signage display that will boost your advertising reach, increase footfall and engage your customers. It is ideal for a range of environments including retail stores, shopping malls, restaurants, universities and more.

Touch screen

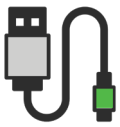
The optional PCAP touch screen offers interactivity for your audience, perfect for information points. They'll be able to interact with your signage in a memorable way - a benefit which traditional print signage cannot offer you.

Plug and play

Run your content or application in minutes using the embedded Android SoC. Alternatively, connect your own mini PC which can be housed neatly at the back of the display. Power your PC from the built-in DC power port with no additional power provision required (subject to required power consumption).

Optional CMS

Control your digital signage remotely from any device with an internet connection by subscribing to our cloud-based digital signage system. Create new messages quickly with the drag-and-drop content builder and publish live on your displays in seconds.



Connect accessories

Boasting 6 USB ports, the Versi suits a range of requirements, allowing expansion with accesories e.g. printer, payment terminal etc. Power a module from the built-in DC power port with no additional power provision required (subject to required power consumption).

Customise your display

The Versi is suitable for installation in a range of enclosures and can be easily adapted for custom projects including self-service screens with payment modules. Contact us to discuss your requirements.

Robust components

Manufactured to the highest standards with commercial-grade components, the Versi is designed to run seamlessly 24/7 with an average lifespan of over 50,000 hours.

3-year warranty

The Versi Indoor display is provided with a standard 3-year warranty included for your peace of mind.

The Versi indoor range

The Versi Indoor is a modular digital signage display available in a range of configurations to suit any indoor screen requirement, whether you need a wall-mounted, ceiling-mounted or freestanding display.

The freestanding models are available as single-sided or double-sided displays. All configurations, with the exception of the ceiling mounted display, are available in passive non-touch or PCAP touch screen.

All models are available in 43” or 55” sizes, with the addition of 32” for the wall-mounted models.

Endless possibilities

Designed with flexibility in mind, the Versi architecture supports a wide range of requirements, whether you're looking for:

- self-service and checkout
- payment and ticketing
- public information and customer help points
- wayfinding and directory

The Versi is easily integrated into any enclosure or furniture, such as a kiosk frame, counter, retail display, cabinet or table in landscape and portrait orientations. Boasting intelligently positioned fixings, peripherals can be easily developed that connect neatly to the displays e.g. cameras and payment terminals.

With 6 USB ports, you can easily expand the display functionality with accesories including printers, scanners and payment terminals. Power your accessory from the built-in DC power port with no additional power provision required (subject to required power consumption).
