

Versi Outdoor Freestanding Digital Signage Kiosk

Weatherproof digital kiosk for outdoor advertising and interactive experiences

www.lamasatech.com

in f X

Elevate your outdoor messaging with ultra-high brightness digital signage

Optional camera and microphone module

Connect our custom designed camera and microphone module for customer service points and AI applications.

Weatherproof

With an IP66 rated display, the kiosk is built to be protected from the elements, for consistent performance in varying weather conditions.

3500 nits ultra-high brightness

With an ultra-high brightness rating of 3500 nits, it is ideal for outdoor settings, ensuring your signage will be crystal clear even in bright sunlight.

Slim bezel

Measuring at just 26mm, the frame around the screen ensures maximum impact and no distractions from your content.

Brightness sensor

Built in brightness sensor automatically adjusts to different daylight hours and levels.

Eye-catching LED lights

LED lighting on the sides of the kiosk attract attention from passersby. Customise your colour and animation settings to match your branding.

Anti-glare toughened glass

The 5mm toughened glass is resistant to glare from natural and artificial lighting and is designed to withstand damage in public environments.

Touch or non-touch

Choose a passive non-touch display for advertising and signage or an interactive PCAP touch screen.

A simple modular set-up with no lifting equipment required

Simple install

Install your single screen kiosk in under 1 hour or your dual/triple screen kiosk in less than 2 hours with a 2-man team!

Plug and play

Play your content via USB stick or run your application from the integrated Android 11 SoC.

Strong WiFi connectivity

The display features a dual band, high gain antenna for a strong WiFi connection.

Durable enclosure

Built from aluminum, this enclosure is ideal for outdoor use, offering excellent rust resistance, lightweight construction, and superior strength. rust and lighter but stronger.

Configurable

Choose from either a single, dual or triple screen to suit your environment.

Security covered screws and security locks

No ports or connections are visible to prevent any tampering with the kiosk.

Auto power

In case of power cuts and outages the display will automatically power on when the power is re-instated.

Modular by design

Every component, including the display, can be quickly swapped out, making maintenance and upgrades seamless and cost-effective.

Weatherproof compartment

Secure compartments for electrics, media player and routers.

Connect a mini PC

For applications that require a Linux/Windows PC, connect your own NUC PC with HDMI in. Mount your PC, neatly concealed within the kiosk frame.

Increase customer engagement with 24/7 signage

The Versi Outdoor Freestanding Kiosk is a sleek digital display that will boost your advertising reach and engage your customers. It is ideal for a range of outdoor environments including drive-through restaurants, shopping malls, tourist information points, university campuses, and more.

Modular by design, the kiosk only takes a short amount of time to get up and running with no lifting equipment required - saving you money on installation technicians.

Easy on-site assembly

Touch screen

The optional PCAP touch screen offers interactivity for your audience, perfect for information points. They'll be able to interact with your signage in a memorable way - a benefit which traditional print signage cannot offer you.

Plug and play

Run your content or application in minutes using the embedded Android SoC. Alternatively, connect your own mini PC which can be neatly concealed within the kiosk frame. Power your PC from the built-in DC power port with no additional power provision required (subject to required power consumption).

Optional CMS

Control your digital signage remotely from any device with an internet connection by subscribing to our cloud-based digital signage system. Create new messages quickly with the drag-and-drop content builder and publish live on your displays in seconds.

Customise your display

The Versi freestanding kiosk has LED colour lighting around the edges of the display which can be customised to align with your organisations branding.

Robust components

Manufactured to the highest standards with commercial-grade components, the Versi is designed to run seamlessly 24/7 with an average lifespan of over 50,000 hours.

3-year warranty

The Versi Outdoor Kiosk is provided with a standard 3-year warranty included for your peace of mind.

The Versi Outdoor range

The Versi Outdoor is a modular digital signage display available in a range of configurations to suit any outdoor screen requirement, whether you require a wall-mounted or freestanding display.

The freestanding models are available as single, dual or triple screens or our double-sided model, suiting all outdoor settings and can be configured as non-touch for advertising or PCAP multi-touch for interactive applications.

Transform your digital signage with our camera and microphone module

Complete your outdoor display with our HD camera and microphone module, perfect for:

- Audience and engagement measurement
- Customer service and AI applications e.g. customer help points using direct call connections
- Entertainment applications e.g. selfie and interactive AR photo booths

Adapt the camera angle easily from the top of the display using the adjustment wheels to set the best angle for your environment. The advanced facial recognition sensor ensures the user is in focus even when there are bad visibility conditions in the background, such as glare and backlight.

The camera uses a Sony IMX335 sensor which provides a better image clarity in low light conditions than normal cameras. It excels at automatically adjusting the exposure to provide clarity on a person's face, especially when there are strong environmental light conditions in the background, which allows customer service agents to see the customer clearly.

The advanced noise cancelling and echo cancelling microphones reduce background noise and maximise the voice level of the customer engaging with the display.

Specifications

Model			Versi Outdoor Freestanding Kiosk
Panel	Screen size	55"	
	Display resolution	1920x1080	
	Viewing angles	178°V / 178 °H
